SUMMARY

Software Developer skilled in full-stack development, AI systems, and IoT integration. Experienced with Next.js, PostgreSQL, Prisma, Python, Django, YOLOv8, and cloud-based workflows. Built real-world applications through internships, freelancing, and hackathons. Strong problem solver with experience in secure auth systems, dashboards, automation tools, and AI-powered solutions.

WORK EXPERIENCE

Backend Developer | influenceMax **Jan'25 - present**

- Building CRM platform with Next.js, PostgreSQL, Prisma & NextAuth; integrated Razorpay, developed secure APIs, dashboards & scalable backend architecture.

Freelance Web Developer

- **Hotel Crown Park** - Hotel booking and gallery system.
- **Mansuri Group** - Business showcase website.
- **Fussed** - eCommerce store with payment gateway.
- **Wear Waves** - eCommerce store for clothing brand with payment gateway.

Freelance Software Developer | influence Max (code)

- Built Python + Tkinter tool to automate personalized bulk email campaigns.
- Features: contact import, templates & one-click mass sending.

Intern, Admin Panel | Government Polytechnic, Ahmedabad **June'24 - Aug'24**

- Developed a secure admin panel using PHP, MySQL, JS.
- Implemented 2FA (Google Authenticator), SQL injection prevention & data validation.

Intern, ERP | Sahana System Limited, Ahmedabad **June'24 - Aug'24**

- Worked on ERP workflows & modules.
- Performed accurate PACS data entry using UniteERP software.

Campus Leader | Hackingly **May'24 - June'25**

- Hosted student workshops & hackathons.
- Guided peers & supported community growth initiatives.

Intern, AI/ML | Innoventa **Aug'23**

- Worked on computer vision & CNN models.
- Built a YOLOv8-based car detection system, improving detection accuracy & efficiency.

HACKATHONS

Hackathon | Hackout'25

- AI + IoT platform to monitor mangroves & detect ecosystem threats. Built Next.js dashboard, YOLOv8 model, ESP32 sensor integration, and FastAPI backend for real-time alerts & citizen reporting.

Hackathon | New India Vibrant Hackathon'23

- Developed Inventory Management System using PHP, MySQL, JS.
- Features: secure login, supplier & transaction tracking, dynamic stock updates.

HACKATHONS

Hackathon | Nirman Hackathon'24

- Built AI-based traffic enforcement system using Django & YOLOv8.
- Automated number-plate reading (Haar Cascade OCR) & memo alerts via SMS/email.
- Included vehicle DB lookup & dashboard for violation records.

PROJECTS

Auto Bing Searcher (code)

- Built an automation tool to simulate Bing searches and earn Microsoft Rewards points.
- Tech Stack: Python, Selenium

CERTIFICATIONS

- **AI Foundations - Oracle (certificate)**
- **Prompt Design in Vertex AI - Google (certificate)**
- **Deloitte Technology Virtual Experience - Forage (certificate)**
- **Deloitte Cyber Security Virtual Experience - Forage (certificate)**
- **Deloitte Data Analytics Virtual Experience - Forage (certificate)**
- **Artificial Intelligence - IBM (certificate)**

EDUCATION

Btech in Computer Science and Technology (AI-ML) **Jul'25 - May'28**

- Adani University
- CGPA : 8.10

Diploma in Computer Engineering **Sep'22 - May'25**

Government Polytechnic, Ahmedabad | Gujarat Technological Ahmedabad

- CGPA : 9.17

KEY SKILLS

- HTML
- CSS
- JavaScript
- BootStrap
- PHP
- MySQL
- Wordpress
- Project Management
- Postgresql
- IoT
- C
- C++
- Firebase
- Prisma
- Python
- Django
- Effective Communication
- Team Leadership
- Artificial Intelligence (AI)
